SUHAIL MALIK

Founder Office intern

+91-8958911424
MORADABAD / UTTAR PRADESH

PROFESSIONAL SUMMARY

High-ownership, analytically driven Founder's Office Intern candidate with hands-on experience in cross-functional project management, product development, market research, and automated workflow optimizations. Proven track record of architecting AI/RAG solutions, optimizing business processes, and delivering data-backed market intelligence. Adept at executing high-stakes strategic initiatives, leading cross-functional workflows, and providing executive leverage in fast-paced startup environments.

CORE COMPETENCIES & TECHNICAL SKILLS

- Strategic & Operational Planning: Market Research, Competitor Analysis, Go-To-Market (GTM) Strategy, Standard Operating Procedures (SOPs), Pitch Deck Preparation, First-Principles Problem Solving, Data Analysis
- Technical & Data Stack: Python, Langchain, SQL, React, FastAPI, Data Structures & Algorithms, Google Sheets
- Product & AI Tools: AI Workflows , AI Agents, Notion, ClickUp, Jira , Zapier, n8n
- Tools & Platforms: Git, GitHub, VS Code, Notion, ClickUp, Asana, Canva, Figma

WORK EXPERIENCE & LEADERSHIP

FOUNDER & PRINCIPAL DEVELOPER | Divergix Labs (Project PDIS) **September 2026 – Present**

- Spearheading the end-to-end strategy, operational roadmap, and technical execution for Project PDIS (Personal Decision Intelligence Simulation), a multi-agent AI system.
- Recruited and onboarded core engineering talent (including Founding RAG/Data Engineers) to achieve product architecture and delivery milestones.
- Conducted secondary market research and competitor benchmarking across target user segments to establish value propositions and product positioning.

BACKEND AI ENGINEER INTERN | FlyRank.AI **July – September 2026**

- Engineered microRAG, a lightweight Retrieval-Augmented Generation engine utilizing FastAPI and SQLite with FTS5 search for high-speed indexing and sub-second query response times.
- Conducted quantitative performance benchmarking across LLM API endpoints to optimize latency, cost efficiency, and search precision.
- Collaborated with cross-functional leadership to integrate algorithmic outputs into client-facing technical reports and strategic presentations.

KEY PROJECTS & ACKNOWLEDGEMENTS

- Global Economic Times Gen AI Hackathon (2026): Shortlisted among Top 129 Finalist Teams out of 55,000+ national applicant teams after pitching a strategic GenAI solution.
- Google Big Code Challenge (2026): Qualified for Round 1 after scoring 14/18 in the nation-wide technical qualifier assessment.
- Open-Source Framework Contributor (2026): Authored accepted Pull Requests (PR #3888, PR #3886) to the Mesa Python framework, modernizing type annotations and resolving performance deprecation warnings.

EDUCATION - NDIAN INSTITUTE OF TECHNOLOGY MADRAS (IIT MADRAS

Bachelor of Science (BS) in Data Science and Applications | 2025 – 2029

- Relevant Coursework: Data Structures & Algorithms, Application Development, Database Management Systems (DBMS).

PROJECTS & PORTFOLIO

Brofessor.AI

- Built and deployed Brofessor.AI, a context-aware AI tutor web application using React.js, Node.js, Express, MongoDB, and LLM APIs deployed on Vercel and Render.
- Designed a custom system-prompt persona engine ("bro" tone of voice) to boost student engagement, resulting in a 40% increase in retention during user testing.

Pro.Cafe

- Architected and developed Pro.CafeCafetarien, an interactive frontend web experience built using React.js, Framer Motion, and Tailwind CSS
